Subject: Emergency Power Extension Objection
Date: Wednesday, 2 March 2022 4:15:38 PM

Dear Sir/Madam

I write to you to formally object to the extension to the Emergency Bill.

While I understand that originally covid 19 presented a significant risk the recently released data by the ABS clarifies that it no longer represents a significant risk requiring such emergency powers.

By enlarge Qldrs have followed government directives regardless of cost to themselves both health and financial but such imposts must stop.

Omicron has been shown to be 90-99% reduced lethality over Delta and given the normal evolution of virus it is more likely that any new variant stemming from Omricon will be even less.

Continuing with the emergency powers sends the wrong message to QLDrs will impact negatively on our economy as well as our mental health.

Please do not extend emergency powers remove all mandates and end discrimination against the unvaccinated as these people form an important part of our community and economy.

Regards

Ken Mitchell
