To Whom It May Concern

I would like to register my firm and direct opposition regarding the proposed Amendment Bill to extend Queensland's State of Emergency. I speak as a concerned Queensland resident.

In lieu of recent information and court rulings. I urge your administration to save yourself the embarrassment of further over-reach by ruling against extending the State of Emergency. It is time to pivot and accept the disease is in decline.

Accurate statistical information from the ABS has brought to light many statistical truths Please consider the ABS Statistics - There is now no justified reason with less than 1% of total Australia deaths; legitimately a covid relatedⁱ.

The hypothetical scenarios employed by way of modelling during covid times are now less relevant however experts also accept and promote the 'disease' is in decline. ⁱⁱ.

Embarrassingly, medical apartheid is enforced in Queensland. The statistics and commentary no longer suggest or support an ongoing healthcare crisisⁱⁱⁱ.

Honest, hardworking people are still being coerced into a trial treatment with severe adverse effects, some prevented from supporting their own families with dignity.

Please consider the Court ruling in France that has found in favor of the insurance company that ruled taking a covid vaccination was suicide. ^{iv}Please consider the High court rulings in New Zealand that found in favor that Police and Defence Force members supporting that it is "not justified". Those members are now exempt from the trial treatment^v. Please consider the UK – Ending mandates, restrictions treating flu like a virus. ^{vi}

The tide is well and truly turning on this! Access to information is available for everyone. We do not live in times of complacent faith in the government and unfortunately this period has only served to erode any trust people had in public members. Please view this period as an opportunity! Armed with accurate intelligence as an opportunity to restore some faith in you all as leaders. Your actions need to be reflective with the up-to-date information we all have access to – not speculative and highly selective beholden to unknown stakeholders. We the people will appreciate being treated with a level of dignity and humanely; we are the stakeholders that matter! Lifting the state of emergency is necessary to return the trust in the Queensland people. Show leadership with decisions that work for us and not against us. Break from the other states – You will certainly see an increase in morale, trust & confidence in your administration. Life will continue as nature intended. To do this the state of emergency needs to be lifted.

Regards

Jude Gregory
