Subject: Cessation of Emergency Bill - QLD
Date: Wednesday, 2 March 2022 6:22:10 PM

My name is Leanne, I reside in [REDACTED]. The proposed extension to the Emergency Bill is unnecessary and serves no health, economic or well-being benefit to our State.

A pandemic which should never have been declared has resulted in:

- false records of cases; hospitalisations and deaths FROM Covid 19 (refer to 2022 data from Australian Bureau of Statistics for evidence)
- significant numbers of adverse reactions (data within TGA likely to represent only 10% of actual events) to the range of experimental vaccines made available AND through fear mongering by Government and media, thousands of citizens have accepted these vaccines without informed consent. The unnecessary Emergency Bill allows these inefficient and dangerous vaccines to continue to be promoted within communities where denial of the injuries and deaths they are causing creating a far greater issue for our health system and Government management of such than Covid 19 ever has been.
- a devastating number of people of lost their jobs, their income, their careers thanks to the introduction of directives issued by the CHO, Premier and Health Minister as a method to coerce further vaccine uptake by the population, when the claims to protect others from the 'virus' are unproven. There are suicides which have been attributed to the loss of jobs and financial hardship resulting from people wishing to retain their right to choose NOT to take an experimental drug. The unnecessary Emergency Bill allows these unnecessary mandates to continue to be implemented and destroy lives.
- families and friendships have been broken apart through what should be a simple 'difference of opinion', however due to the fear mongering and continued dialogue around the (evidently) false seriousness of this virus.

I lost a job I loved, was loyal to, and was a person making a significant difference to many people. I worked in disability. I managed a team of staff. I had fun. I cared about the people I worked for. I was forced out of my job (via dismissal) because I declined an experimental vaccine and was unable to be present onsite - yet the very people I cared for did not have the same requirement. When is it about health when as an unvaccinated paid employee I was unable to attend work, yet an unvaccinated person with a disability could still be present in all the same spaces? When the pandemic response decisions discriminated in this way it was clearly further evident this was NOT a Health Emergency response. There is no justification for mandates nor this Emergency Bill.

[REDACTED], who is very unwell, suffers extreme mental health, and whom I was his key mental health support has disowned me. We did not get together at Christmas. He didn't respond to my contact for his wedding anniversary. He didn't respond to my contact for his birthday. His reasoning? "No vaccine; no me". How is the Emergency Bill

helping him? Setting him up to spiral into further depression - possibly to a point where I will never have the chance to reconcile with him. We have been there before, close to him 'ending it all', luckily we were still close then, I could support him. His 'ending it all' thanks to the promoted segregation doesn't need to happen. Removing the Emergency Bill will allow the reparation of relationships and community (to some degree), however for many it is already too late. Don't make it worse by prolonging this through an unnecessary extension.

The Emergency Powers Bill has demonstrated that its use is so far from ethical or even practical, that by agreeing to extend it any further would be a gross injustice to the people at large and a precursor to further overreach from our manipulative Government authorities.

I DO NOT Support the extension of this bill and want a complete STOP put to this outrageous government overreach. I implore you to please prevent this atrocity and ensure the people of Australia can focus on rebuilding and moving beyond this traumatic pandemic period.

Stand for truth. Stand for the people.

With utmost sincerity,

Leanne Chippendale
