**Subject:** Submission regarding Qld government emergency powers  
**Date:** Wednesday, 2 March 2022 6:25:12 PM

---

Below is my request that the emergency powers move by the Qld government be rejected immediately and all kinds of attempts to further steal power from the citizens through fear tactics and misinformation be discontinued immediately and the Bill for emergency powers be halted and scrapped.

Out of a psychological warfare attempt there ya rather successful attempt to fear people into adopting - against their own voluntary informed consent or will (so they can keep their jobs and income) - medical procedures that are experimental.

This is against the Magna Carta, various human rights treaties, the Commonwealth constitution and the Nuremberg Code.

The death penalty is the highest punishment given if found guilty of breaking the Nuremberg Code. Just informing you all, in case you didn't already know of this.

If only less than 1% of 1% of people in Australia are actually dying of sarscovid2 and/or it's claimed variants, please answer clearly:-

Where is the emergency?

So why introduce emergency powers?

I request you to think and act on the right side of the law and of history or face the law and the consequences in your future as per and the laws and treaties mentioned above.

According to the responsibility bestowed upon me by the law I have duty of care over myself and all Australians and to uphold the law itself and therefore my words above are both an order and a humble request

Jason Anthony Rapp
