My name is Sonya Fleming and I want to express my absolute frustration at the way this state of emergency has been run and now I hear it is to be extended!

It must end so we the community's of Australia can get on with life and over what we all have been through. Because of these mandates I lost my job. Im unemployed, living off my savings and won't be asking for financial assistance till I get down to my last dollar, which won't be that long if these mandates don't STOP and I can get my job back!

My family have all suffered stress and anxiety over all that has been forced upon us by a Government that doesn't seem to care. Look at other Countries that have given their citizens back there lives and decided it best to live with this virus.

Please just stop and consider the consequences of this action and all the votes you will lose next elections!!!

Regards
Sonya Fleming
