To whom it may concern,

We have been made aware that the Qld State Government is planning to extend the state of emergency - again.

This is not an appropriate response or management strategy for a virus that has a 99.9% survival rate and in a state with 90% of people vaccinated.

We realise that the system in Qld provides little or no checks and balances or accountability even when the government is without the powers available in a state of emergency, but still request that it not be extended.

Surely there are other things for the government to get on with after 2 years focusing on covid.

Kind Regards,

Mr David and Mrs Alexandra Todd
