The State of Emergency in Queensland is based on 2 false premises.

1. - that SARS COV 2 is real. (It has NEVER been isolated. If you think it has - show me proof).
2. - that the PCR test is valid. (It is not valid. The inventor of the PCR test, Kary Mullis, said it was NEVER intended to detect virii. Also, the CDC, in mid 2021, said the test produced false positives and was to be withdrawn by years end).

I therefore say NO to any extension of the State of Emergency in Queensland.
