SUBMISSION TO THE QUEENSLAND PARLIAMENTARY COMMITTEE INQUIRY INTO EXTENDING QUEENSLAND'S 'STATE OF EMERGENCY':

Under the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022, Queensland's 'state of emergency' laws will be extended from 30 April 2022 to 31 October 2022.

MY NAME: Adrian Henrik Kass

Address: [REDACTED]

Daytime Phone: [REDACTED]

Email: [REDACTED]

MY POSITION ON THE MATTER: I am AGAINST the extension of the 'State of Emergency' in Queensland.

REASONS FOR MY POSITION ON THE MATTER:

1. THIS STATE OF EMERGENCY IMPACTS ABILITY TO WORK:

- I am a teacher and I need to get back to work. I am suspended and not allowed on site due to my choice not to take a medical intervention that does not stop me from catching Covid.
- I am a Math's and Science teacher and my replacement is not specifically trained in these subject areas. How many other cases are like this, where the education of students is being affected because healthy teachers are not allowed to work? We are suspended and not allowed on site, because we have not taken a medical procedure. There are thousands of us.
- Mandates on doctors, nurses, paramedics, police officers, supermarket workers, etc must be lifted as these people need to return to work. Threatening people with their livelihood does not serve the community health, it creates division, takes away our human rights, promotes Discrimination, is unfair, unjust, is not about health, is coercive.
- It is coercive to DEMAND that I am vaccinated to do my job. Vaccination guidelines say that it is illegal to force anyone to take a vaccination. There must be full valid and informed consent. I cannot consent while I am threatened with my job.

2. THE QUEENSLAND GOVERNMENT SHOULD MAKE DECISIONS FOR OUR HEALTH AND NOT TO SERVE THE VACCINATION INDUSTRY?

- The Queensland Government should be a servant of the people. They should not be in

business with business people to buy and use up the purchased vaccinations to the detriment of our freedom and way of life.

- I and many others are tired of being dictated to by the government which has used these emergency powers to use the power against us and take away our right to cross borders, to talk with our neighbours, to celebrate our personal celebrations, be they weddings, funerals, birthdays, etc. I understand it is difficult to give up power once it is held, but that is exactly what must happen.

3. END THE STATE OF EMERGENCY

- There is no good reason to continue with the STATE OF EMERGENCY.
- Allow citizens autonomy over their bodies - no coercion to be forced to have a medical treatment.
- I could find many more reasons: such as the impact on mental health of the harsh controls imposed on people by the government under these emergency powers.
- Families need to get back to normal life. We need to remember that our health is a personal choice, taken every time we decide what to put into our bodies.
- If the government really cared about our health then:
 - The government would MANDATE eating vegetables, healthy protein, fruit, organic wherever possible.
 - The government would have approved EARLY TREATMENTS for Covid-19, which are only now being proclaimed by the Main Stream Media as valid treatments. There are more than 10 early treatment protocols which have been used successfully to treat Covid-19 patients from the first strains to the present main variant which is now a mild one stage event (does not progress to the inflammation stage which featured in Alpha, Delta and early strains).
 - Therefore, a better option than continuing to create intolerable conditions for the people of Queensland, is to allow Covid to be treated as per other illnesses. Allow the doctor/patient relationship to go back to what it was rather than what we have had since the State of Emergency and that is a Government/patient relationship. The Government is not a medical professional with a doctor/patient privilege that values privacy of information

4. THE STATE OF EMERGENCY IS AN EXCUSE TO TAKE AWAY OUR HUMAN RIGHTS

- There is so much evidence of this e.g. mandates that coerce people to take a medical intervention (vaccines mandates) to keep their job (coercion). These attacks on our human rights have not been fully tested in the courts but it is going to happen.
- Why is the Queensland government doing this when we all "have to live with Covid"?
- There are other violations such as from the Anti-Discrimination Act which is under review this week.

Take notice that I demand the extension of the state of emergency powers NOT be approved and all vaccination mandates be lifted immediately.

Warm regards

Adrian Henrik Kass
