Re: PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS)

AMENDMENT BILL 2022 (BILL)

Dear Committee Secretary,

I wish to formally advise, as both a resident of the State of Queensland and citizen of Australia that I categorically DO NOT support the extension of the Bill or the States immorally imposed Public Health Emergency. Your government has not provided any sound evidence to support the imposed measures and in fact has acted against the best advice of the World Health Organisation and the United States Centre for Disease Control in forcing (to coerce the vaccinations without informed consent) children into unsafe medical procedures. Further, the understated and life-threatening Adverse Reactions have been willingly suppressed.

I simply do not understand your governments motivation for imposing these restrictions when the known side effects are publicly acknowledged:

1. Rising mental health issues
2. Rising Domestic Violence
3. Rising suicide rates
4. The destruction of the states small to medium enterprise to the benefit of multi-national corporations
5. Continuing adverse reactions in previously healthy individuals, long after vaccination

It is clear to me that the Premier of this State has little regard for the 'common' people. This is evidenced by allowing politicians a blanket exemption from vaccinations. That decision in itself warrants a Royal Commission into the behaviour of our most senior politicians.

It is incumbent on the Committee to act on behalf of the very people that you represent, because it is clear that the Premier is not, nor is the Human Rights Commissioner, in blatantly ignoring health statistics across the globe. We have clear evidence that alternate measures (avoiding mass vaccination) have been demonised yet the use of Ivermectin and Hydroxy-Chloroquine have been incredibly successful in many communities to minimise casualties from all strains of Covid-19.

I will not succumb to forced medical procedures and I have not used masks as I have reviewed the efficacy of these measures and entirely disagree with the application and use of these measures. I have had close contact with numerous Covid-19 victims and have not experienced one single day of illness. Yet every Covid-19 positive person that I know has been vaccinated. What does this say about the vaccinations? In my observations, ***the vaccination is the disease***.

Act with your conscience, the only right decision is to return the freedoms of the residents of this state that have been illegally taken away.

Sincerely

Paul Casley
