Subject: EMERGENCY BILL EXTENSION REJECTION
Date: Thursday, 3 March 2022 10:30:52 AM

Good Morning,

I am writing to express my concern that you are trying to extend the Emergency Bill when there is simply no need for one in the first place.

I think it is pretty obvious by now to the general public that this “pandemic” has been the complete opposite and that covid has not been anything to fear at all. And surely if the general public are catching on then there is no need for this masquerade to continue.

In fact it has been nothing but a bad case of influenza and if people were to get the pre-treatment like the Queen was afforded then there would have been no deaths or hospitalisations “from or with” covid.

There is proof now that the data has been grossly over exaggerated by the government to fear monger the people into getting an experimental drug. In fact the data is showing that more people have been injured or died from the experimental drug than have died from covid. In my circle there have been 3 deaths and 16 friends and family that were injured and some have permanent side effects from this. Pfizer’s data submitted to the FDA contains 8 pages of known side effects.

I have also witnessed the destruction of our economy on a global scale due to my nature of work. People have lost their jobs, houses, families have been divided and so have many communities. I know people who were ostracised from clubs, events and functions due to not being “vaccinated”. MSM played “handy hints” on how to un-invite your family to events if they were not “vaccinated” – disgraceful to say the least. People have not been able to visit sick or dying relatives, and some poor people ended up dying scared and alone.

Friends of mine have been coerced into getting this experimental drug to keep their job and even after they have had a bad reaction to the first shot they were forced to get the second shot to keep their jobs. In what lifetime is any of what is happening normal or just. The litigation that is going to come out of this will be ongoing for years to come and you will be paying hand over fist for what you have knowingly and willingly created.

You have done nothing but segregate, cause death, injury, division and destruction with these unlawful rules and mandates. And all for what!

If your aim was to bring down the economy, then well done - you have done a fantastic job.

But it’s time to stop hoodwinking the public and give up the goat – we know the truth that this was never about our health as none of the measures you put in place would have ever saved us from a real pandemic.

Believe me if you pass this bill you will have a lot more people on your doorstep than there were in Canberra, we all have had enough of the control you are trying to desperately hold onto.

Joanne Hahn
