---

To whom it may concern,

My purpose of the email is to express my OBJECTION to the Extension to the Emergency Bill (until 31st October 2022).

- The extension of powers is based on COVID deaths in Queensland and COVID numbers. The ABS data is now showing the exaggeration of such data. As the mortality of COVID does not supercede the commo flu, there is the absence of logic , science and evidence to declare the situation as emergency /global pandemic , what more to extend the emergency period to give more autonomy to the government to implement rules and mandates.

- I have previously shown my objection towards the vaccine mandate on the working population. As a former allied health worker it is ethically wrong to corner an individual to choose between medical freedom and putting bread on the table. Hence, to me, to extend this emergency situation is absurd .

- As we all know, the vaccines have not been proven to contain any spread of the virus .Neither have they succeeded in stopping the virus from mutating. I have a friend whose uncle has died with COVID even after receiving 2 jabs. And to keep jabbing the population with the same vaccines which have not kept up ( which is impossible) with the mutations of COVID virus and expect the vaccines to be effective is just illogical.

- Extending the emergency period also provide opportunity for those in authority to abuse their power on the residents.

MY CONTACT is as below:

Lastly, i do hope sincerely that the people's objections, heartcry and resistance will be seriously considered based on the wisdom and power of the authority, to rule justly and compassionately, and always for the good of the people.

Yours sincerely,
