Please do not extend the operation of essential public health measures implemented to facilitate Queensland's response to the Covid pandemic.

The mandate is crippling Queensland. Families have lost their income, relationships divided and mental health is a serious issue, in fact mental health is the PANDEMIC that this government needs to seriously address.

The majority of measures need to end on 30th April 2022 if not before.

There is significant unrest.

Yours in anticipation

Mr Neil Davenport
