**Subject:** Opposition to Extension of the Emergency Bill  
**Date:** Thursday, 3 March 2022 11:51:16 AM

---

Dear Committee

I write to you today to voice my opposition to extending the Emergency Powers to October.

As the ABS has provided details data in relation to deaths from Covid, it is clear that Covid is not one of the leading causes of death to Australians. This information alone should cease the emergency power extension.

<https://www.abs.gov.au/statistics/health/causes-death>

Also in regards to vaccines, mandates should be gone as there is clearly no difference between vaccinated and unvaccinated.

[https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

Below attached. Screen shot from the Pfizer safety study shows that  
**1,223 PEOPLE DIED WITHIN 90 DAYS OF VACCINE**

**1 in 17 people (5.74%) suffered a fatal outcome**

The MHRA however had full knowledge and went ahead and authorised the Pfizer vaccine stating that

*“The most common side effects with BNT162b2 (which may affect more than 1 in 10 people) were pain at the injection site, tiredness, headache, muscle pain, chills, joint pain and fever. Adverse events were usually mild or moderate in intensity and resolved within a few days after vaccination.”*

(See list of side effects below screen shot above)

[Pfizer safety study:-](#)

I look forward to a committee doing the right thing by Qlders.

Kind regards  
Shelley Millen

BNT162b2

## 5.3.6 Cumulative Analysis of Post-authorization Adverse Event Reports

Table 1 below presents the main characteristics of the overall cases.

**Table 1. General Overview: Selected Characteristics of All Cases Received During the Reporting Interval**

	Characteristics	Relevant cases (N=42086)
Gender:	Female	29914
	Male	9182
	No Data	2990
Age range (years): 0.01 -107 years Mean = 50.9 years n = 34952	≤ 17	175 <sup>a</sup>
	18-30	4953
	31-50	13886
	51-64	7884
	65-74	3098
	≥ 75	5214
	Unknown	6876
Case outcome:	Recovered/Recovering	19582
	Recovered with sequelae	520
	Not recovered at the time of report	11361
	Fatal	1223
	Unknown	9400

a. in 46 cases reported age was <16-year-old and in 34 cases <12-year-old.

As shown in [Figure 1](#), the System Organ Classes (SOCs) that contained the greatest number ( $\geq 2\%$ ) of events, in the overall dataset, were General disorders and administration site conditions (51,335 AEs), Nervous system disorders (25,957), Musculoskeletal and connective tissue disorders (17,283), Gastrointestinal disorders (14,096), Skin and subcutaneous tissue disorders (8,476), Respiratory, thoracic and mediastinal disorders (8,848), Infections and infestations (4,610), Injury, poisoning and procedural complications (5,590), and Investigations (3,693).
