Subject: Opposition to extension of Qld Govt pandemic powers.
Date: Thursday, 3 March 2022 11:51:59 AM

To whom it may concern.

I strongly oppose the extension of the Queensland Government's Pandemic Powers, termed "Essential public health measures", implemented to facilitate Queensland's response to the Covid -19 Pandemic.

A small sample of reasons is listed below.

1. There never was a Pandemic here.
2. There were several treatments available for this virus, which were banned for use in Queensland – criminal in my view.
3. The PCR test which people were forced to take was totally unreliable, and was never designed for this purpose.
4. These false results led to the supposed need for lockdowns to protect the population from a virus which could have been easily treated. The disgusting rules separating loved ones and advising them not to hug each other, and preventing them from attending weddings and funerals, not to mention forbidding businesses to operate, and forcing mask wearing, even for young children, should be classified as "Crimes against humanity".
5. The pretence led to a "need" for a vaccine. It wasn't a vaccine, but an experimental gene therapy, forced upon people through scare tactics, and threats of repercussions if they did not conform.
6. Mandates imposed have caused divisions within society which should never be the case.

This madness should end NOW. There is definitely no need for an extension of these harmful procedures which have nothing to do with health, but all to do with CONTROL and power.
