Subject: Extension of mandates
To: <cssc@parliament.qld.gov.au>

Dear Honourable Members of the Committee,

I am writing to you concerning the upcoming consideration for the extension of the emergency bill later this month..

As a vaccinating pharmacist who has dealt with the health crisis at the coal face and who has personally vaccinated over 1000 people in my community, I applaud the government response to the Delta COVID-19 threat so far..

However, ...I implore you to consider the vastly different nature of the new Omicron strain, and the rapid rate of its demise from our society.. It has become very clear to health professionals at the coal face that Omicron can be effectively dealt with, without further Government mandates, so the extension should not go ahead.

Please be proactive and realise the difference between these strains, and also that the appetite in the community for government control measures has been well and truly been sated..

If you would like to hear more on these matters, from someone at the coal face, do not hesitate to call me ..

Yours Sincerely
Jay Harvey
Pharmacist
