**Subject:** NO SOE BILL EXTENSION  
**Date:** Thursday, 3 March 2022 12:48:04 PM

---

Hi there,

This email is to address my concerns and issues regarding the proposed extension of Emergency Bill taking the end date to 31/10/2022 instead of finishing in April 2022 as it is due to.

This past two years we have been spoon fed the narrative that if we all sit tight for two weeks to flatten the curve we'll be right, if we all get a job we'll be right, if we all get a second job we'll be right but if we do or say anything against it we're wrong. Well it's extremely obvious this is untrue, unjust and downright unfair.

There is zero evidence of a pandemic now, there is also zero evidence of a health emergency related to a respiratory virus, SARS-Cov-2. We are not witnessing people dropping dead in the streets as we were made to believe was happening in China, we are not witnessing unvaccinated people in a worse state than vaccinated, I'm living proof of that and I actually have a compromised respiratory system, go figure!!!

Please stop telling us to trust out of date science and follow models that were put in place BEFORE any job was offered and before any of this mandate bullshit. I have lost my job, my income, my opportunity to enter the house market, my ability to take my children to certain places. This has to end, it has in many other countries and they are not all dropping dead from releasing mandates.

I hope the right decision is made for the people and most importantly for our precious children. Let us get back to normality, let us live our lives for goodness sake!

Thank you,  
Emma Burgess
