Subject: END THE STATE OF EMERGENCY
Date: Thursday, 3 March 2022 1:37:25 PM

Dear Sir/Madam,

An extension to the State of Emergency in Queensland to 31st October 2022 is not required. Evidence on government sites clearly show the exaggeration of Covid case data. If so many people are vaccinated, then from here on we should be looking to establish herd immunity which CANNOT be secured by 100% vaccination of the community.

Our economy has suffered enough! Businesses have suffered enough! Families have suffered enough! It will soon be time to ditch those in government who insist on following tyrannical strategies of control.

The segregation of people with a different job status, has created disunity across all sectors of society. Soon there will have to be a national apology made to those who have been ostracized - in the same fashion as the National Apology to the Indigenous people!

Because of the current State of Emergency there is greater strain on welfare to accommodate the many people who now are without jobs due to business closures and/or not opting for the job. Elections are just around the corner and this is even more cause to 'listen to the people'. End this State of Emergency and take a leaf from the African countries who have administered ivermectin to eradicate Covid-19 completely!

END THE STATE OF EMERGENCY!

Donna Gallehawk
