Queenslanders have worked hard to keep the spread of COVID-19 amongst the community to a minimum.

We have been promised that we would have our freedoms back once vaccination rates reached 90%, that time has come and it is now time for the Palaszczuk Government to follow through with their promise.

Throughout the pandemic data has been represented in a way to exaggerate the severity of illness and deaths caused by COVID-19. This data, along with disgusting, threatening marketing campaigns have been used to manipulate Australians and divide our communities.

The rest of the world is beginning to return to normal and as usual Australia is miles behind, the laughing stock. Stop embarrassing us and let's move on from COVID-19 because let's be honest, everyone is tired of hearing about it.

We DO NOT need an extension to this bill, we DO NOT want an extension to this bill. Queenslanders have done their part. Now it's your turn to do yours.

Warm Regards,

Tia Berger
