To whom it may concern,
'2 weeks to stop the spread' has fractured Australia in unimaginable ways. The faith in Politicians and the media is totally lost due to severe Totalitarian over reach. Citizens are more divided now than ever before which poisons the air with a tense smog more harmful than 'climate change'. To extend these powers is many steps too far from a Government who have become experts at shifting goal posts and braking promises. I vow to never vote for a major political party again after the handling and treatment of both the state and federal governments. To add extra stresses on already broken Citizens especially enduring constant government and media lectures, intentional national mis information and censorship, international wars, 'changing science' to fit the narrative, cost of living and fuel, incoming inflation, housing crisis and add to that the major flood events we are enduring in Queensland. We have had enough of the Government interference in our lives all we want is to live freely and in peace so at least give us that right. Your job is to work for the people , we are not working for you as we work for our families, friends, community and our country. Abolish all the Bills and Covid laws and hope Australians forget the enormous mishandling of Government.
