Subject: Not to extend emergency bill
Date: Thursday, 3 March 2022 10:19:31 PM

I ask that the emergency bill not be extended.

The effects of so many of the measures taken have had a significant effect on our lives which could have been dealt with by prioritizing, protecting the aged care and those who are high risk .

The effect to me personally

Wearing a mask when i have asthma or hay fever - restricts my breathing even more - causing coughing fits etc

Segregation of unvaccinated is probably the worse and stats are not supporting the effectiveness or need for such measures.

As both vax and unvax can carry the virus

Both can get Covid - seriously or in a minor form

Both die and live

The effect to me personally at 64 .

Has effected me by isolating from my friends - which is not healthy

Unable to go for coffee with friends or groups

Unable to go to dinner to celebrate birthdays

Unable to attend conferences - of I am part of the team that hosts the event

Unable to go to the Theatre to celebrate birthdays

Tomorrow my family are going to stay in Coolangatta for a holiday - so we can go across the boarder to the cinema, coffee , out to dinner , or take grand kids to entertainment activities- all our holiday money being spent in NSW - while the business we normally support are struggling or operating illegally supplying coffee and food to their regular customers - yet everywhere else we mix together - no logic in it

I went to the airport - social distance - vax and no vax .then get in the plane herded together for hours - really?

My family have been affected

1. My daughter has lost her job

2. Son in law faced loosing his job but his work place has reconsidered mandatory vax as 25 percent of their staff had indicated they would not have it and would leave - lot of taxes going down the drain

3. My grand children now home schooled rather than being sent to school with masks on and to ensure they will not be vax ed without parent permission

As you can see these measures that have been enforced on us have significantly affected our family and I do not believe the Government stats warrant this.

The vax is only on trial and there is no way anyone knows the long term effects it will have on us or particularly the next generation .

No medical procedure has ever been allowed without informed consent - My choice - every drug you buy has a long list of side effects which the doctors discuss with you before taking them .

I am made to feel a leper in my own country - a cafe will not serve me, i cannot take my grand children to the movies or out to lunch - except in a food court yuk with a lot of people - very noisy - how ridiculous is that

My grand children have been unable to go to the the theme parks during holidays for which they have passes - They ask why ? And we have to explain why we choose not to vaccinate .

It is an horrific form of manipulation and control and unbelievable that it could ever happen in our nation.

Please do not extend the emergency bill.

Thank you

Jane Leonard
