Subject: The Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022
Date: Friday, 4 March 2022 6:38:37 AM

Dear Sir/ Madam,
(To Whom it May Concern)

As a concerned Australian citizen (living in Queensland), having felt that I have not been allowed the true freedom of choice whether to be vaccinated or not for Covid-19, I do not agree with the implementation of the "Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2022."

I have come to realise that there is information to say that Covid-19 data has been manipulated making the supposed Pandemic appear to seem worse than it really is. Therefore making those of us feel that we have to be vaccinated because our lives depend on it.
(Whether we're in good health or not.)

And I absolutely don't agree with the bullying tactic of no pay unless vaccinated or no service unless vaccinated.
Where's the "Freedom of Choice" here?

Is this not a democratic society?

Hasn't the Pandemic significantly improved?

Is the Government's main concern here really about the welfare of the people it serves? It would appear not. It seems to be more about having power over the people it serves than doing what's right for the people.

And these mandates appear to only bring about segregation in the community. Causing much unnecessary unrest, tension and stress. Anti-health.

Please, for the sake of a happy and healthy people, cancel this Amendment Bill.

Regards,

Melanie Griffiths
