Subject: End the State of Emergency in Qld
Date: Friday, 4 March 2022 7:11:06 AM

To the Members of Qld Parliament,

There is no emergency.

The powers may have been appropriate, briefly, at one stage 2 years ago while we figured things out.

But science HAS figured things out. Now, science and our own ABS has told us:

1. The most vulnerable are very elderly with co-existing conditions, or the immunocompromised- and this population will remain vulnerable regardless of any state of emergency
2. The lockdowns were useless, and caused more financial and emotional harm than any tiny bit of good they may have achieved. My business loss, and the fact that I have not been able to see my elderly parents overseas in 3 years can attest to that.
3. Masks were of very questionable effect. And as a speech pathologist, I can attest that children on my caseload with speech and language issues, such as: hearing loss, childhood apraxia of speech, ADHD, developmental language disorder, etc HAVE suffered in their learning of language.
4. Vaccines have minimal efficacy against Omicron, and never worked properly in our poor children who have been injected with a treatment that has not completed safety trials (SHAME!!!) and weren't included in the original studies of efficacy
5. The fearmongering divided friends, families, and loved ones
6. Vaccines bring the risk of adverse side effects which includes deaths. Personally, my father suffered 2 brain clots after Pfizer. (Yet, I am expected to take that same drug to travel and see him). Where there is RISK there MUST BE CHOICE. There is a crucial reason for the Hippocratic Oath and Informed Consent.
7. Doctors and healthcare workers must NEVER be gagged from providing clear and accurate medical advice regarding something as serious as injecting yourself with an untested vaccine (please don't say millions have taken it, therefore it is tested. The human population should never be guinea pigs because our polities are in a state of kneejerk panic).
8. The younger and healthy population does not NEED a vaccine- as I can attest having had Omicron and suffered a mild cold for 2 days that did not stop me. Whereas many of my young and healthy friends suffered horrible side effects from the vaccine, including one who lost 3 weeks of work due to shingles activation. None of them had a doctor that had the time to do the 30 minute report to VAERS.

9. None of your 'experts' (I hate that word, everyone who agrees with the government is an 'expert' – everyone who disagrees is a quack, anti-science person) had their predictions come even close to being true.

DROP IT.

THERE IS NO STATE OF EMERGENCY.

CITIZENS ARE EXHAUSTED OF THE SCAREMONGERING.

WE SEE THROUGH IT.

WE DON'T WANT TO BE PROTECTED.

WE WANT ALL OF OUR HUMAN RIGHTS RETURNED.

WE WANT YOU TO REFLECT UPON WHAT YOUR MANDATES AND 'EMERGENCY POWERS' HAVE CAUSED.

Amy Amberg
