---

Hi,

I do not wish for an extension of the emergency bill. It is not necessary.

There has been a large exposure already to Covid 19. We have survived.

The updated statistics of people who actually died of Covid rather than with Covid, as first reported on the media is very low.

There has been a massive effect on mental health throughout the last 2 years, by demanding people not see family, do not hug and hide your faces.

The evidence is that masks do do not work. The government first told us this two years ago, so why has it been a requirement?

We have created a society of medical apartheid. If you are submissive to the government, you are rewarded with temporary freedom.

So many people have lost their jobs because of these mandates and yet, they still refused to have a forced medical procedure.

There are so many people injured from the so called 'safe' vaccines with 'rare' side effects. The vaccines are not safe and the injuries are not rare. I personally know of a number who have been affected.

I do not wish for an extension of the emergency bill.

-

Regards
