Subject: Resubmitted submission against Extension of Emergency Powers
Date: Friday, 4 March 2022 7:57:29 AM

Hello

I am totally against any extension of Emergency Powers for several reasons.

Firstly, no publicly available medical advice is indicated.

More importantly ABS data does not support the

"pandemic" nature of this virus that had been promoted.

According to the latest survey, the Australian Bureau of Statistics (2022) has outlined that over

the last 22 months a grand total of 273,901 Australians died overall. Of this total

only 2639 deaths were related to COVID. Of this total 92% (2427.8) had at least

three serious/life threatening comorbidities. This brings the total deaths Australia

wide from COVID to 212. These numbers are not even

slightly compelling in the

narrative of a deadly or infectious disease, therefore it begs the question as to

whether anyone would benefit from, or would need, any medical intervention which would keep people "safe" from this illness.

There are many other reasons too such as continued violations of human rights, religious discrimination and breaches of the Nuremberg Act- too many to briefly list and acknowledge.

Thank you for considering my submission that is NOT supportive of the proposed extension.

Regards

Kerry Sleath
