

March 4, 2022

Dear Committee,

I am sending this email to advise you that I strongly oppose and reject any extensions of the newly proposed Emergency Bill.

There is no real concrete evidence to support any claims made by government in relation Omicron/Alpha and Delta variants that these variants require a State of Emergency.

The stats and figures supplied by government have been highly over-inflated and have been based on falsified information supplied by the health department.

Any extension of a S.O.E. should be avoided at ALL costs as it is definitely not warranted and it will have a detrimental impact on the people of Queensland.

The negative mandates and the negative impact/s that they have made on people's lives and their livelihood is totally unacceptable.

I therefore, urge you not to proceed with any further extensions.

Yours Sincerely,

Ron Williams
