**Subject:** No extension to emergency bill  
**Date:** Friday, 4 March 2022 8:51:32 AM

---

Dear Secretary

I am providing my voice here to state that I DO NOT consent to the extension of emergency bill .

The reasons I do not agree to this are the exaggerated statistics provided for covid related deaths in ABS data provided and a vast underreporting of vaccine side effects and injuries especially to the public via the media. Also not granting medical exemptions to people who need one or allowing those who have one to return to work such as in education or prisons is beyond comprehension. People who are in their 80s and 90s with Covid is NOT a valid statistic that can be used to validate vaccinating healthy children for an illness that is not a risk to them.

This undemocratic and unAustralian treatment of unvaccinated Australians needs to stop now. To exclude unvaccinated Australians including our 16 yrs olds and young people at such a socially sensitive time is both cruel and incomprehensible and needs to end now. The damage to our children will be an embarrassment to Australia for a long time. For them to be Excluded from going to dinner , movies and venues with their peers is wrong and does not make any health sense when people are mixing together in all sorts of other venues.

I personally have been unable to continue in my work as a school Chaplain and there has been no one to replace me as yet, staff , families and children needing emotional support during this time have been without their school Chappy at the most dire of times in our history and now with floods devastating our region. There has been no Chaplaincy team or volunteers to run breakfast club for the children or the lunchtime programs we ran for social and emotional support.

It makes no sense at all why unvaccinated staff are not allowed on premises even to say goodbye or visit but unvaccinated parents are - if it was truly about health this would not be happening.

Our children lost many key staff at their school and have in senior years often been without a teacher. Please reinstate teachers and school staff and return the right for vaccination to remain a medical and private choice as it should be between a person and their doctor.

There is absolutely no proof that the covid vaccinations prevent Covid ( the actual definition of a vaccine is that it is supposed to prevent you getting an illness) . Almost every vaccinated person we know has had Covid now and many who remain unvaccinated remain Covid free or if they have had Covid it's been no worse than those that are vaccinated.

Where is the public and media related admissions of the vast amounts of people injured by the Covid vaccination? One or two here or there is a vast underreport of of the actual numbers . A host of doctors worldwide at risk of their jobs have been calling for an end to the Covid vaccines - why would they be continuing with even a 1 proportion of related heart attacks and deaths that have been reported.

My grandma now triple vaccinated has been cut off in her last days even from my triple vaccinated grandad for two to three weeks at a time - this makes no sense and is cruel and incomprehensible . People need hugs and family and deserve to choose the risk for themselves . If there is still risk here in the triple vaccinated then it's clear the vaccines don't work. End this tyranny and cruelty please!

Please end this emergency and covid related mandates , there are many ways people can boost their immune systems and return to a state of optimum health , there needs to be choice of treatment and prevention of illness in a democratic nation .

I would like to hear a reply please and look forward to the day when my family can return to our society, return to work to support our community and families and meet with my friends at a coffee shop and go out to dinner again.

[REDACTED]

In hope of a reunited society and an end to mandates  
Grace and peace  
Amy Kuczynski
