Re: Public health and other legislation extension of expiring provisions Amendment Bill 2022

Queenslanders have been living under a state of emergency for over 2 years and I am deeply opposed to any further extensions. Nothing good has come from this no cure no containment. There is no appropriate justification for this amendment. Human rights and freedoms should be fully respected. The emergency powers have been abused. The health minister must declare this to be ended. This has proven to be no worse than a flu and all of this not being able to make your own health choices, division of people, vaccine deaths and injuries, mental health, loss of jobs, loss of businesses, lockdowns and masks, elderly having no visitors and dying alone nothing worthwhile was achieved. Until your affected you turn a blind eye which I did until my child was vaccine injured. Now I see how many other people have lost loved ones or have vaccine injured loved ones also. The toll this has taken on Queenslanders in all different ways is disgraceful. This should have been pulled up long ago not passing another extension enough damage has been done. There is no emergency that needs this power I am asking the committee to review in detail all the **FACTS** all the proof is there. Do the right thing for Queenslanders and **DONT PASS THIS BILL**.

Yours sincerely,
Mary Shun
