I vehemently do NOT support any policy that forces unnecessary & harmful measures upon Queensland & any Australian citizens.

There is NO state of emergency.

There is no more risk of death by C19 than by any normal yearly flu. (Proven).

There IS great risk of death or injury by forcing what has been mislabeled a 'vaccine' created, without the years of trials necessary to ensure safety & efficacy, which is being ruthlessly forced upon our population with dire consequences for those that refuse it.

Unethical & immoral comes to mind.

The FDA's own first adverse events report (which they wanted to unscrupulously hide for 75 years) demonstrates the terrifying list of adverse effects from the c19 jabs. 1 in 35 people died after getting the injection IN JUST THE 1ST 3 MONTHS!!!

There IS RISK, great risk, of adverse outcomes from this coerced procedure.

We know scientifically masks do NOT work for this scenario.

We know the massive scale of tragedy the lockdowns caused.

There Is NO pandemic & never was.

We KNOW there is another agenda here & it has nothing to do with health.

DO NOT extend the SOE. Halt all control measures for the people of Queensland. We are ALL ABLE to decide the best measures for us personally & our families without the dictate of government.

Sincerely,
Deborah Baker
