Committee Secretary Community Support and Services Committee

Dear Committee Secretary

I do not support the Bill nor the extension of the state of emergency.

I suggest to you that the people of Queensland have had more than enough of lockdowns and mandates, with the resulting job and business losses, and social isolation and angst and even fear that the people have endured.

I believe people would be happy to return to 'normal' social freedoms and circumstances, and live with covid from here on as with influenza.

How about our Government run some campaigns to help people support their health slash immune systems via eating well, appropriate exercise and paying attention to emotional wellbeing?

With Regards

Peter Lamb
