Committee Secretary  
Community Support and Services Committee  
Parliament House  
George Street  
Brisbane Qld 4000

Dear Sir/Madam

RE: Public Health and Other Legislation (Extension of Expiring Provisions)  
Amendment Bill 2022

I thank you for the opportunity to submit to this inquiry. As a former Deputy Rescue Leader for North Logan State Emergency Service who did both the Wardens & Welfare courses, I believe I am able to positively contribute on this alleged health emergency.

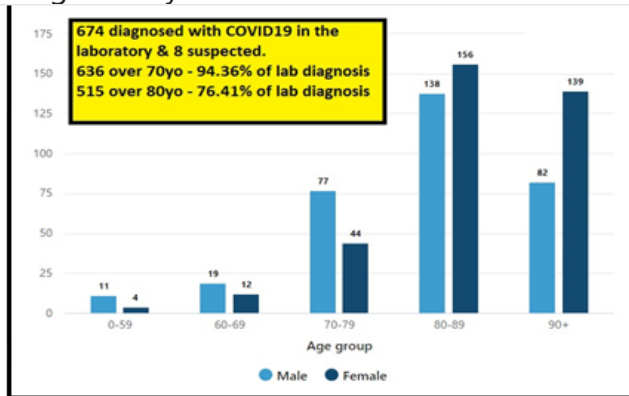

I note I have been monitoring COVID-19 since January 2020 when I quickly identified a hoax was being pulled & caught who was ramping it up. I have a Diploma of Accounting that includes forecasting & I designed my own model based on China's deceased. My estimate of 55 deceased per cold & flu season (90 days) in total for Australia was submitted to Australian 27 May 2020. ABS figures less comorbidities as at 31<sup>st</sup> August, 2020 were 43. I was 12 out. This was submitted as part of an original 63pg peer reviewed submission accepted now to both Royal Commission Aged & Disability Abuse. Year 2 as at 31s July, 2021 after almost 2 cold & flu seasons per ABS data the total for Australia was 103 deceased. I was 7 out. The Royal Commission Disability Abuse received an update from me 100+pgs on COVID-19. The information has been widely circulated in the public domain & I intend to go on & make an attempt to lodge a case at the International Criminal Court as I believe numerous crimes have been committed.

The full Royal Commission submissions can be accessed via my public access blog page.

Yours faithfully,  
Tracey Hoolachan

Royal Commission Disability Abuse – Part2 COVID19 by Tracey Hoolachan

2.1.7(c) Consider the bar graph above of 674 laboratory confirmed deaths as at 31<sup>st</sup> August, 2020. The symptoms are identical to influenza/pneumonia so inflating the cases by that 8 is just absurd. 515 were below 80 y.o. 674 – 515 = 159 below 80yo. 72.7% (key statistic below) had pre-existing chronic conditions. 159 x 72.7% = 115.59. 159 – 116 = 43 people not frail aged or chronic that died of laboratory diagnosed COVID19 in cold & flu season. It should be also remembered some of the deaths were imported cases.

2.1.8(d) The picture at 2.1.6(d)(i) is part of a rough model I tweeted daily. The source data was WHO Situation Reports & I just tweaked the calculation with the new data: -

2.1.8(d)(i) As seen at the bottom of the first box I predicted 55 deceased for Australia across 90 days with no interventions. Australia had a ridiculous level of medical interventions that has financially damaged the livelihoods of many sending them into poverty. The long term physical mental damage this has caused is cataclysmic. The people now frightened of Australian doctors is reflected in the over 50% surveyed that are averse to the promnoted vaccine. At 26 Feb 2020 I estimated deaths equated to 57. This was the turning point in China's season end & no's were in decline. At the end of the 90% period the figure for an Australian season using China's data & my simple formulae was 55. I was 12 out. In a Court of law I would have no hesitation in stating my opinion the lock ups were to hide COVID19 was not a threat from the start.

Mid Dec-15 March2020 2019-nCoV acute respiratory disease

At 18 Aug 2019 Figs Aussies flu season described as moderately bad

217,000 infected

430 Dead

Aussies population is 24.6 Million.

ABS stats on 2017 bad flu season

251,142 infected

1255 Dead

1.709% of China's 1.44Billion

24,600,000 x 0.005628% (China's confirmed cases to population) x1.0000 (13 wks or 91 days into normal 13wk or 91days flu season) =1,385infected estim. confirmed infected cases had no intervention occurred in Aussie. Currently we are on 249 confirmed case

24,600,000 x 0.0002225% (China's dead to population) x1.0000 =55 estimated dead in a full season had no intervention occurred. Currently in Australia only 3 death 78yo 95yo & person in their 60's

NB: 26Feb2020 WHO noted a turn when global new confirmed exceeded figs in China. On 25th no intervention cases=1692. Estim. deaths at that time 57.

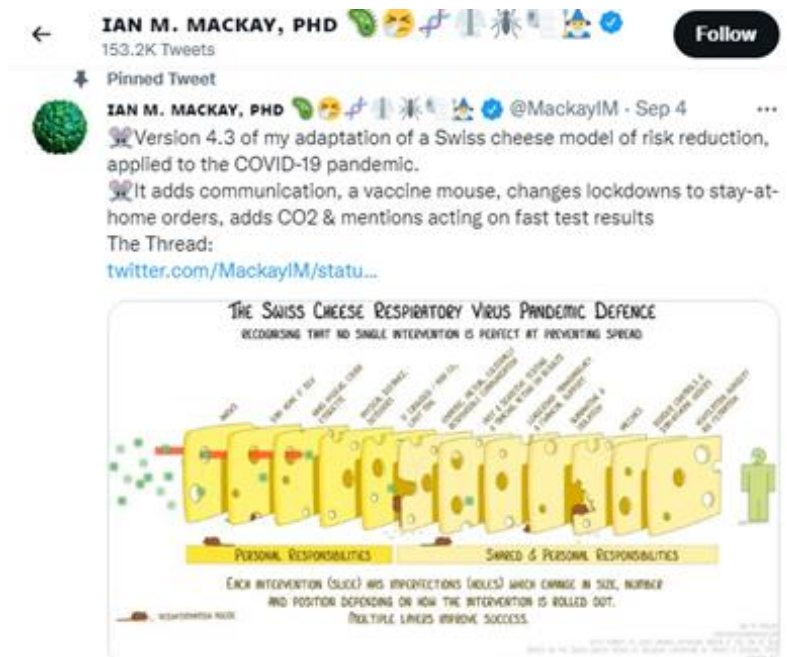

NB: 1 March2020 WHO notes our first death. The 78yo did not contract nCoV2019 in Australia.

- 1.1 In this submission I will make references to Royal Commission Part 2 (RC P2) downloadable from my peer reviewer <https://www.sabhlokcity.com/2021/02/extensive-analysis-by-tracey-hoolachan-of-the-covid-situation-in-australia/>) & my RC P2 Update available on my blogspot page <https://democracydemon1.blogspot.com/2022/02/covid-19-update.html>.
- 1.2 There was never any emergency for COVID-19. I picked up on it when it was being ramped up initially on only 28 deceased in China's cold & flu season. China's Hubei Wuhan lockdown was 23 January, 2020 a few days before their New Year. The date of the first cluster presents was 30 December, 2019. If this was the alleged super spreader with a 14-day incubation period considering a mid-December patient0 it was already well & truly out. But it was nowhere. Even in the Northern Hemisphere. NB: - the first tests on surface life were in China February 2020 & even then it was found to be sensitive to heat. This was confirmed at a later time by CSIRO. That raises very big questions on the motives of the Qld Govt pulling COVID-19 across summer.
- 1.3 By the end of February 2020 every Govt in Australia should have been 100% certain that the disease was not lethal or a super spreader based on China's data. 96% of deceased allocated COVID-19 were inside the lockdown region Hubei Wuhan. The borders though went up 2.78 cycles of 14days after patient0. Considering Wuhan Hubei is at the centre of a busy train network carrying surface & in an enclosed space again confirming this was not a super spreader. Plastic airbags had additionally been carrying any alleged virus across the world for a long time.
- 1.4 Everything was a fraud. It was ramped initially by 2x former Liberal Democrat doctors for political gain who had trolls on social media directing anyone following COVID-19 closely in the initial period & this was supported behavioural economist working with Behavioural Insights Team UK (BIT) & others. From my Royal Commission update lodged 22/02/2022: - "Scientific Pandemic Insights Group on Behaviour (SPI-B) are reported to have apologised as they ***“exaggerated and cooperated with trying to create a climate of fear beyond the evidence”***. Psychologist are being investigated by regulatory bodies in UK for what's been described as a military grade cyber-attack on their own citizens. Behavioural Economic Team Australia (BETA) operating inside Prime Minister & Cabinet Office is working with Behavioural Insights Team UK (BIT) that is part of SAGE. The threat of COVID-19 was never real for COVID-19." I have made connections with Qld Health & BIT that go back to 2018. When I have a social media post of a supervising scientist at Qld Health designing a behavioural insight nudge diagram depicting Qlders as vermin, you know this game is over now.

Submission: Tracey Hoolachan

- 1.5 The lockdown of Australia was 20 March 2020. At this time Govts had data from both UK & China. UK committees had already downgraded COVID-19 BY 13 March 2020. This was publicly announced in a press release now dated 19<sup>th</sup> March 2020. When I saw this notice, it was originally dated 18<sup>th</sup> March 2020. Another blogger also saw the earlier date. This was noted in my Royal Commission Part 2 (RC P2). This 13<sup>th</sup> March 2020 date was before borders were closed; Ruby Princess & the Melbourne hotel games.
- 1.6 It has all been a show to ramp up fear so people will get the tests & a vaccine they never needed in the first place. Neither the PCR, RATs tests or vaccines could ever work for testing for COVID-19. In point of fact WHO conceded in June 2021 that the “original” genomic virus sequence had changed (RC P2 Update s3.1.1(c)(xv)). All the tests & vaccines were prepared based on a wrong virus sequence. So, you should ask what they have all been testing for & vaccinating for. When you get to the part where you realise the tests have only been stealing peoples DNA genomic data without fully informed medical consent you realise the tests have all been a crime. When you realise that the vaccines, we were told were developed crucially with the genome sequence for COVID-19, you realise that fully informed medical consent could never possibly have been given & each injection was an unwarranted medical procedure & a crime.
- 1.7 There was never any point to the vaccines. There had already been an estimated 300+K mutations by 30 June 2020. Natural immunity was already evident inside the Hubei Wuhan lockdown area or as at the end of February 2020 they would have already been dead. RC P2 Update s3.1.1(g)(v): - “From the start of patient zero mid-Dec2019 to 6 Jun 2020 (approx 6mths) China reported 4645 COVID-19 deceased per WHO situation Report no. 138. Most of these deceased were frail aged & had comorbidities. This 6-month period up to 6 Jun 2020 included 1x cold & flu season. On 6 June 2021 approx. 1.5yrs since the start of COVID-19 Our World in Data reported China had only 4,846 deceased<sup>5</sup>. I note I used this data because WHO ceased providing updates to situation reports on China which is

Submission: Tracey Hoolachan

astounding in light of monitoring reinfection & the effect of natural immunity build. 4,846 total dead mid Dec2019 to 6Jun2021 minus 4,645 total dead 6Jun2020 to 6Jun 2020 equals only 201 deceased. In the same country with increased freedoms **only 201 people across China's population of 1.4Billion died accredited to COVID-19 for an entire year spanning 6 June 2020 to 6 June 2021.** In this period the majority of Chinese were not vaccinated & had less restrictive COVID-19 measures than the Wuhan lockdown etc."

1.8 As at 10 January 2022 after 2years of COVID-19 there was a sum total of 11 deceased attributed to COVID-19. 13<sup>th</sup> January, 2022, Qld supposedly had its worse day ever of 6 deaths from Omicron, when really the deceased were aged between 70 & 90. That health system being overwhelmed was from sheer neglect that was evident before COVID-19. In point of fact, it was so overwhelmed that the Qld Govt signed up to take on Norfolk Island health in COVID-19. An act that if the system was overwhelmed should be deemed gross negligence.

<https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/current-status/statistics>

Patients currently in ICU	27
Deaths	11
Cases of First Nations people <sup>[2]</sup>	2,663

Data as at 10/01/2022 19:00. Refer to [data caveats](#).

**Total cases—cumulative graph**

The graph below shows the total number of cases in Queensland as they increase over time, as per the daily case number announcements.

1.9 All of the measures: - masks; lockdowns under threats of fines for non-essentials; experimental vaccines; check-in APPs; social distancing have been unproven, untested & previous to COVID-19 warned against. All measures have been proven unwarranted & in many cases are now found harmful.

1.10 That the Qld Govt has continued to inflict a medical apartheid, support masks, cost people their jobs for exerting their right to choose natural immunity over a vaccine that is racking up an unbelievable number of adverse effects is unconscionable coercion.

Conclusion: -

The Qld Govt has never had grounds to claim a State of Emergency for Health for COVID-19. Court cases from other countries are going offshore for justice & Australia is going to be under the microscope as the most locked down country. My data has already gone overseas. Based on 11 dead in 2 years & the heat sensitive tests the Qld Govt is never going to be able to show it had any reason to implement the emergency legislation in the first instance. It being allowed to extend the State of Emergency for COVID-19 is not going to pass any pub test in light of the information coming out worldwide now. Everyone subjected to the 17 December, 2021 medical apartheid is now a victim as much as those who have had the vaccine & the Qld Govt members are in a lot of trouble.
