Dear Sir/madam,

The covid crises is over. Many countries have dropped all mandates and have returned to normal life. We DO NOT want or NEED an Extension to the Emergency Bill (until 31st October 2022).

Nurenbourg 2.0

- Nuremberg 2.0 is underway with thousands of lawyers, doctors and scientists proving that crimes against humanity have occurred under the pretense of a covid crises.

Internationally dropped

- The uk and many European countries have dropped their mandates, the Supreme Court in the US has deemed them unconstitutional and this week even in NZ their high court has got rid of mandates. The period of fear and propaganda is finished as people wake up to the fact that 99.9% of the population have nothing to fear.

Covid is flu like

- Everyone knows Delta has been overtaken by the very mild flu like version of Omicron. Stop the fear tactics and let us get on with life!

Abs data for Australia

- The extension of powers is based on COVID deaths in Queensland and COVID numbers is ridiculous. The ABS data is now showing the exaggeration of such data. Only 2,639 deaths in the whole of Australia have occurred by 31 Jan 2022 and the highest number of these deaths are of those over 80 years of age. The median age for males who dies of covid was 83.7 years and females 86 years. Surely this is not death from covid from death from old age. If we look at data with pre-existing conditions, only 8.6% of deaths had covid reported alone on the death certificate!!

Abs data for Queensland

- As of 31 January 2022, only 69 people have died from covid! While these deaths over the over 80s are regrettable, 791 people took their lives in Queensland in 2020 and this was highest in men aged 35 to 39. From this data we can see the covid health crises is a sham!

Unemployment

- According to budget review on social security and welfare, in 2020 new start, jobseeker payment rose by a whopping 97.5%! They spent \$28.2 billion on corona virus measures! We can not afford to use the pretense of covid to keep the economy stalled. We need to move on, drop mandates, drop density limits for smallll businesses and get back to work!

Democracy

-Australia is a democracy and power should be in the hands of the elected government Who represent and work for the people . These emergency powers are not democratic! The emergency powers are being used to instil fear, rule us and control us where a rulers in democracy are accountable to the people.

Sincerely,
Elizabeth Spittal
