---

Hi

I don't want an extension to the Emergency Bill to pass. All it has done is isolate families and friends etc.

Over the past 2 years there have been 273,901 Australians who have died. Only 2,639 were Covid related with 92% of these having series underlying health conditions.

This vaccine was supposed to protect you from getting Covid but I have had friends that had the vaccine and now have Covid.

Please stop the Mandates and let people go back to their jobs. The hospitals are short staffed because many nurses and doctors refused the vaccine as they have seen the health issues and deaths arising from the vaccine.

Yours sincerely

Gabrielle Davis
