Dear Councilor,

I do not support this extension for the following reasons

- *Reports of health concerns due to Omicron are exaggerated. It is a new wave influenza and people are not dying from it.
- *The real risk is the escalation of mental health issues, depression, suicides, as we are a highly populated country and a major concern is that these include many young people.
- Demo depression and self-harm.
- *Many including myself have had to stop work because we do not consider the vaccines are sufficiently tested. We are not anti-vaccines but vaccine hesitant. In fact there is no evidence that any vaccine is what kills people.
- *If the SA Professor Petersen says COVID-19 was a lab leak I would arm up yesterday. The mega-pharmaceuticals have a vested interest in this to which they are committed.
- *It is known that nurses and doctors who speak out also lose their professions.
- *Mandatory vaccines are illegal.
- *Sua materia has been covered by WHO CoVID-19 as it is a responsible and dishonest.
- *Vaccine mandates are cruel and unfair. They mask and QR code signs to be a sign of a health pass.
- *The actions of Omicron have not changed. To increase emergency powers when they have been used and other life-changing events are only increase depression and a sense of helplessness.
- The government's commitment to maintain a high standard of living for people is what the vaccines which are pro-fabricated in fact can affect. In fact harmful.
- It is time to move on to the country, the citizens and our own government.

Sincerely,
 Ruhi Bhowmik

This backs my understanding that the health emergency has been exaggerated and the real danger to health is in the vaccines themselves.

As per the Virus and Terms for COVID-19 Literally "Harmful" - Ch. 16 of the Health Act

<https://www.legislation.gov.uk/ukpga/2004/41/section/122/section-122.html>

Kind regards
 Ruhi Bhowmik
