Subject: Submission AGAINST extending the PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS) AMENDMENT BILL 2022.
Date: Friday, 4 March 2022 9:48:06 AM

Good morning,

My name is Roz Smith of [REDACTED]
[REDACTED]

I am submitting this submission as I wholeheartedly oppose the extension of the Queensland State of Emergency. There is no reason for this To be extended. A supposed “Pandemic” of which, only 83 people have actually died from, is NOT a cause to extend the state of emergency.

What this supposed pandemic has done to our beautiful people, state and country is absolutely traumatic and disgusting. Including the loss of jobs, inability to put food on the table for family’s, the constant exclusion of people from society, people who were heroes are now dismissed like they meant nothing and the list continues... All because of a personal health choice to not put an EXPERIMENTAL vaccine into ones own body.

Our government should be providing us true facts and guiding what is actually best for us not scaring, bribing, forcing people into doing something they do not want to do that will forever affect their own body. Not to mention how covid has run wild through the vaccinated and still the unvaccinated are not allowed to partake in a normal society.

I do not consent to the proposed extension of

PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS)

AMENDMENT BILL 2022 there is no need for it, other than for evil.

Thank you,
Roz Smith
