---

To whom it may concern:

I want to say NO to the extension of the Emergency Bill which you propose to extend to 31st October, 2022, for these reasons:

- Australia is a democratic society and mandating vaccination is undemocratic because it promotes exclusion.
- Any person, vaccinated or not can transmit any virus anywhere, so, why punish unvaccinated people because they have made a decision that is right for them.
- Segregation in societies always ends in conflict. We don't want that in Australia.
- Friends have lost jobs. They are good, highly educated professionals who made choices that align with their beliefs and health decisions. that's not democratic and is a great loss to society.

Please DO NOT EXTEND THIS BILL.

Mary Martin
