Subject: End the State of Emergency
Date: Friday, 4 March 2022 9:57:58 AM

Paul Gallehawk

Dear Sir/Madam,

Ending the State of Emergency should be a priority. The statistics show that the spread of covid has not eased since these mandates have been in place. Covid does not discriminate between the vaccinated or unvaccinated, but our state government does! The results of these mandates are as follows: 4000 of our most highly trained healthcare workers have been stood down; specialised staff in aged care and home care services were stood down; education staff stood down, hospitality staff stood down, police and emergency workers stood down; disability workers stood down; airline workers stood down and multiple other industries and businesses affected or closed due to these mandates. All of this destruction for no change in the situation of covid.

It would be senseless or stupid to continue doing the same thing (these mandates) and expecting a different result. End the stupidity and let Queenslanders get back on the job of rebuilding this State.
