

I DO NOT agree to the extension of the Emergency powers

The mask mandate has physical and mental health impacts. I have a medical issue that prevents me from wearing a mask and I have been ridiculed for not wearing one. I don't believe any face covering works as the virus particles are much smaller and can penetrate ALL mask types.

Covid-19 is a re-branded 'flu' and weaponised to control the masses into submission of fear.

Covid -19 death numbers broadcasted by mainstream media outlets have been embellished to incite fear to everyone, mainly the young and elderly.

Lockdowns have been harmful, frustrating and inconsistent to businesses and some simply cannot stay afloat. The harassment they have received had been disgusting. Three cafes in my local area (that I know of) have been harassed and pressured to follow the ridiculous conditions placed upon them, their staff and clientele.

Coercion, pressure and mandating the vaccinations is against basic rights for individuals to make their own health choices. I have family who have lost their jobs due to the mandates. It has placed a terrible burden on their family relations, finances and wellbeing.

Jabbing and masking children is totally wrong. I fear for their future, in health terms and their mental health.

The censoring, silencing and shutting down of health practitioners and researchers who offer alternative and safe options to boost the immune system is abhorrent. Never before has this happened when a vaccine is the only option that the Government wants to employ as the Covid-19 treatment.

Governments are apparently 'following the science' but every State and Territory in Australia has different protocols in determining their Covid response. Should they not be the same response across the board if the science does not lie?

We are not a Communist country, but our Government is removing the rights of every Australian and rail-roading us into a tyrannical way of life. I am scared for the future of this beautiful country if this Government control continues.

I say NO to extending the Governments power over us!

No! No! No! No!

Cherie Zahra
