Dear Committee Secretary,

I wish to formally advise that I **do not** support the Bill nor the extension of the state of emergency.

I have not taken part in the experiment, for my health reasons, initially when the virus was discovered we were told the best way to protect ourselves was to build our immune system. This I have done.

Then the government was protecting the elderly by introducing a vaccine, again I did not consider myself in this vulnerable group, but now because I have continued to look after myself I am now segregated.

The continually changing of the goal posts and making rules that make no sense have not inspired me to have myself injected with something that is doing less than I am already doing.

I have learnt the hard way that we the people certainly need to pay closer attention to what our elected leaders are doing.

I look forward to hearing that this bill is certainly not extended, but dismissed altogether.

Regards
Gayle Patricia Ahern
