

I am writing in **OBJECTION** to the PUBLIC HEALTH AND OTHER LEGISLATION
(EXTENSION OF EXPIRING PROVISIONS) AMENDMENT BILL 2022 for the following
reasons:

- The extension of power is based on COVID deaths in Queensland and COVID numbers. The ABS data is now showing the exaggeration of such data
- As of late February 2022, we have not heard one single news mention of Covid-19 therefore one would assume that it is not a threat to the public health anymore - <https://www.news.com.au/>. <https://www.abc.net.au/news/>
<https://www.skynews.com.au/>
- It is widely held opinion in the medical world that the Omicron variant poses no greater threat than flu- <https://www.afr.com/policy/health-and-education/deaths-from-omicron-and-delta-waves-similar-to-worst-flu-season-20220208-p59uoi>
- Countries around the world like the UK, Republic of Ireland and Denmark have downgraded this virus to an endemic and have scrapped all mandates - I refer you to this article <https://www.latimes.com/world-nation/story/2022-02-02/more-countries-easing-covid-restrictions>
- Some States in America and other countries did not enact any emergency powers and did not impose mandates on their population even in the height of this pandemic and the DATA shows they were no worse off than us. It is now coming to light those lockdowns didn't work, and many people have now lost their livelihoods and suicide rates are higher than ever before. <https://www.washingtonpolicy.org/publications/detail/comprehensive-research-finds-that-lockdowns-dont-work>
- We will never know the terrible human suffering that happened under these powers
- An extension of these powers has no bases in medical science as the DATA contradicts this push by the government
- Mandates are being successfully shot down in high courts around the world
- I am an Australian citizen and am TOTALLY against this extension of emergency powers and I believe there is no basis of fact to grant this extension.
