---

Hi,

I truly believe the Emergency Bill should NOT be extended until the 31/10. Studies have proven that the vaccination itself does NOT prevent a person from catching COVID-19, therefore it is NOT for public safety that the emergency bill be extended. There is no scientific research that frontline workers will be helping the community because they are vaccinated, they will merely be helping themselves as their symptoms will be less severe if they are vaccinated. This should be a personal choice. To also prevent an uproar from the significant amount of people who have lost their jobs I believe the emergency bill should END. We need to learn to live with COVID-19 as it is not going anywhere.

I have lost 2 jobs due to the mandates, my mental health has suffered more than my physical health. This should also be taken into consideration.

People should have the right to choose what is injected into their body, they should have the right to weigh up the risks of the vaccination and decide for themselves if they want to be protected. It is NOT a safety risk for others if a person does not get the vaccine because like I mentioned before they can still catch COVID-19 and pass it on. Please I beg of you, take this into consideration. Let people get their jobs back! This is ruining people's lives.

Kind Regards,

Ebony Sale
