Subject: Objection to extension of the emergency bill

Dear Committee,

I object to any Extension of the Emergency Bill for the following reasons;

An extension is not warranted and should NOT be granted. Although any death is tragic the survival rate is very high for COVID 19.

There has been an over reaching of the use of the Emergency Powers by the government. Lockdowns, mandates and quarantine have had a disproportionately negative impact on the mental health and economic health of the community. The measures taken by the government did not have the desired outcome. The policies implemented have proved coercive, discriminatory and had long lasting devastating effect on the community.

Any extension of the powers is not required to meet and respond responsibly, proportionally and co-operatively with the community.

My personal information including my name, signature, address or contact information is not to be disclosed when displaying this submission.

Regards

Kristy Shore
