████████████████████

Stance:

- I DO NOT support this bill.

Reasoning:

- The emergency powers have brought segregation and discrimination within our communities
- The vaccination has NOT stopped the transmission of COVID-19 and in a lot of cases, it hasn't affected the severity
- The current mandates are not only causing mental health issues, but also hardship on individuals, families and businesses
- People have committed or attempted suicide because of the impact of COVID-19 mandates and restrictions
- Restaurants and cafes have been forced to reduce operational hours, change operation to take-away only, or shut their doors for good, because of the restrictions of the mandates.
- The ABS data is showing that there is an exaggeration of data relating to COVID deaths
- Staff shortages in critical industries (e.g. healthcare), where unvaccinated staff are being asked back to work because of staff shortages
- Health Minister Yvette D'Arth stated on 25th February in a press conference **"This is now part of our lives and people will contract COVID"**
- Most mask mandates are lifted on 4th March after 6pm, so why can't the other mandates be lifted?
- The Australian people have proven their stance against their mandates when they presented at Canberra
- Vaccine injuries are not being reported or accepted
- The number of vaccine injuries from COVID-19 vaccines are far greater than other vaccines that have not been approved because of their smaller number of injuries
- A large number of Senators and Members of Parliament do not support the mandates, so why are they not being heard?
- Other countries have abandoned mandates and restrictions and are managing, why can't Australian follow suit?
