To whom it may concern,

It has come to my attention that our Premier Anastacia Palaszczuk is applying for an extension to the Emergency Powers Bill.

I cannot see any good reason why this should be allowed given that, if the vaccines are as affective as we are lead to believe and 90% of our population have received them, there should be no ongoing emergency.

Either someone is lying about

1. Effectiveness of the vaccines
2. Number of people who have been vaccinated
3. Scarcity of the side effects
4. The absence of alternative treatments

OR

Our esteemed Premier is simply applying for another power grab.

In addition to this Omicron has proven to be a much less deadly strain of the virus as seen throughout the last few months. These emergency powers are unnecessary and are causing continued segregation within society. It is time to get back to a united Australia moving forward together. Let's move away from the needless and harmful shaming and tension.

There is now no emergency.

  
Please vote NO to extending emergency powers.

Thank you,  
Deni-Ka Collingwood
