To whom it concerns:

Do NOT consent for the government to get more emergency powers for a virus that by the Australian Bureau of Statistics stated that covid is responsible for 1 Percent of the deaths.

-It is not ok to close borders.

-It is not ok to make people take a new drug in the trial stage

-It is not ok for people to loose their livelihood for not taking medications into their bodies

I personally lost my teaching job along side approx 30,000 of educational staff. Not to mentions the people who where coerced into taking the vaccine against their will so they could put food on the table. I had studied for 5 years and had 14 years experience teaching. My pay rate goes from approx \$80 an hour to the minimum wage of approx \$22 now. How do I feed my family? How does my friend a single mum of two feed her family?

END emergency POWERS NOW!

Kind Regards

Anna Crowther
