To whom it may concern,

As a resident of Queensland I emphatically disagree with an extension of the Covid 19 emergency powers until the 31<sup>st</sup> October .

There are no grounds to continue these powers.

We do not have a Covid pandemic . The survival rate from this flu is greater than 98%

We now have more deaths and disastrous side effects from the vaccines than we did from Covid.

Our government under these “powers” has ruined Queenslanders lives.

We have had enough of lockdowns that destroy small business .

We have had enough of wearing masks that are injurious to our health (as stated by many world renown scientists and doctors and the information censored by main stream media).

We have had enough of mandating people to take an experimental vaccine to keep their job. This is against human rights! Just because there is a SOE does not negate this but our Qld government (and all the State Governments and Federal Governments seem to think it does).

These measures have been cruel and heartless and to top it off we now have vaccine apartheid where the non vaccinated are unable to participate in certain aspects of society, including public services which their taxes pay for ,such as art galleries and museums. This is totally unnecessary as we know that being vaccinated does not protect you from illness or stop you spreading it!

Under the state of emergency our government has been abusing our human rights as stated in the Qld Human Rights Act 2019,page 18. This is what I do not wish to see continued under any circumstances.

It is disturbing enough to see what Dan Andrews has done in Victoria with his bill.

We are supposed to live in a democracy in Australia where our elected leaders act in service to their constituents. This is obviously no longer happening in Australia as our governments are acting tyrannically under these SOE Powers and appear to be the servants of the pharmaceutical companies instead. Follow the money !

Australia used to be a country where people escaped from tyranny and could feel safe. This is no longer the case . I do not feel safe as an Australian citizen .

I have sent numerous letters to my local politicians and also have sent letters to Yvette D'Ath and Annastasia Palaszczuk regarding the dangers of these over reaching government powers and forced vaccines to no avail.

I note that today the TGA is in a court case regarding it's negligence in not removing the vaccines from approval when they have ample evidence that they are dangerous. The public are aware of these statistics.

This SOE must not continue.

Yours faithfully

Sue

Maitland
