Subject: Submission - PUBLIC HEALTH AND OTHER LEGISLATION (EXTENSION OF EXPIRING PROVISIONS)
AMENDMENT BILL 2022 (BILL)
Date: Thursday, 3 March 2022 5:13:16 PM

Dear Company Secretary

I am disgusted that this bill is being considered. A State of Emergency should be an acute, not a chronic, event. There IS no State of Emergency. The NSW government has openly admitted to manipulating covid-19 data ("back capturing"). I believe, like many Queenslanders, that if not before, covid-19 is now very similar to a flu - potentially dangerous, but extremely unlikely. It should therefore (now) be regarded with the same amount of potential impact as same.

We don't want any more government control over our state of health. We don't want careers and businesses slaughtered by mandates. We don't want to be forced to get vaccinated. We don't want to wear a mask. And we don't want any more lies. Yes, lies. For example, the "reward" of "freedom" the Premier announced for vaccinated people was in actual fact punishment for unvaccinated people. This segregation should be stopped immediately, I consider it to be illegal.

No extension.

Sincerely

K Hayes
