Subject: Extension of bill
Date: Thursday, 3 March 2022 5:30:12 PM

Dear Sir/Madam,

I object to the extension of this bill for the follow reasons;

- Countries around the world have downgraded this virus to an endemic and have scrapped all mandates
- Some States in America and other countries did not enact any emergency powers and did not impose mandates on their population even in the height of this pandemic and the DATA shows they were no worse off than us except that decision to continue life as normal, giving the right to choose vaccines/masks and treat patients with effective therapeutic drugs, meant no livelihoods were destroyed, businesses and schools remained open, suicides did not rise and mental health incidents did not rise through the roof like here in Australia- the most disgusting part of these mandates
- We will never know the terrible human suffering that happened under these powers, the increased suicide rate amount young people during these powers and the decrease in quality of life for the general population under these powers
- An extension of these powers have no bases in medical science as the DATA contradicts this push by the government, the science indicated that lockdowns and mandates should not be used in a pandemic
- Mandates are being successfully shot down in high courts around the world
- The only reason to extend these powers is to keep the government in total Marxist control over the people

Rebekah Armstrong
