Hi,

To even consider extending the state of emergency again is absurd. I could explain the scientific and medical reasons why it is no longer justified, but I suspect these facts are already known. For a society to function, it needs to have trust in its government and this means having confidence that powers (especially emergency powers) will be used proportionally, in good faith and not be abused.

I'm happy to discuss this with anyone who would like to.

Kind regards,

Tim [REDACTED]
