Subject: "Covid" is a false threat. Deny Extension of Expiring Provisions Public Health Amendment Bill 2022
Date: Thursday, 3 March 2022 5:50:29 PM

World-wide, governments are repealing the Covid Mandates.
Statistics are proving the Vaccines are more dangerous than any threat of this supposed virus.

The Statistics have been misinterpreted again and again, saying deaths and side effects are from this virus, when they are most often in vaccinated people.

The damage to our industry, our economy, families, and our public health is a disgrace, all based on a false threat.

The coercion is ILLEGAL. The bullying tactics for enforcing dangerous, and useless, vaccination are shameful.

Extending the rights of a government to continue this policy is against Human Rights.

Why is this government upping the ante, when most of the rest of the world (other than New Zealand and Canada) is seeing the truth and acting on it.

Leigh King
