Dear Sir/Madam ,

Re: Submission to committee, Extension of emergency powers proposed by the Palaszczuk Government.

I have resided in Queensland for the past 26 years and as very concerned citizen I strongly disagree with the granting of an extension of the Emergency powers given under the guise of a health issue.

The World Health Organisation changed the guidelines for the classification of a "Pandemic".

This virus has proven to be no worse than a flu (corona virus)

Queensland needs to return to a normal social and economic state as soon as possible.

I believe extending these emergency powers to the government will create more social anxiety and more economic disasters

People are losing businesses and livelihoods due to unreasonable restrictions

Please do not allow any further extension to the duration of these emergency powers

Yours faithfully,

Stephen W Snooks
